

*The summer maintenance kit*

BioGuard is relaunching its Summer Maintenance Kit, containing sanitiser, oxidiser and algaecide. It can also be tailored for individual pools depending on requirements. The company also recently launched a Winter Kit which proved popular over the colder months.

BioGuard Commercial Director Lindsay McGrath says pool owners are busier than ever and finding the time for DIY maintenance can be challenging, so this simple kit accompanied by easy to follow instructions will make it easier for them to look after their pools.

Customers of BioGuard Approved Retailers who purchase a kit will receive a free gift and go into a draw to win one of ten iPads.

*AccuScan2 and the Halogen V*

BioGuard National Sales Manager Julian Quinn says that since BioLab (owner of BioGuard) entered the Australian market in 1983, the company has led the way with affordable water analysis, with water tests costing as little as 70 cents.

The latest AccuScan2 tests pool and spa water for Free Chlorine, Total Chlorine, Total Bromine, pH, Acid Demand, Alkali Demand, Total Alkalinity, Total Hardness, Cyanuric Acid and Borates, and can be used in conjunction with the AccuScan2 Halogen V Test Strips and BioGuard's own proprietary water analysis software.

The Halogen V Test Strips are the next generation of halogen strips and have been developed with a wider pH pad for improved accuracy.
