

# Dontek Solar Controllers

## The Smart Choice

**Introducing the  
AquaSmart**  
Economical.  
Reliable. Smarter.

The **AquaSmart** utilizes its in built memory and recognizes when the sun is shining, starting the system at the optimal time. This ensures maximum heating efficiency saving money.

dontek.com.au • Leaders in heating control innovation

The **AquaSmart** is easy to operate with its large back lit LCD, user friendly interface and robust construction making it the leading product of its kind. No nonsense codes ensures you are informed clearly and with no fuss. Also, a clock function can be enabled which eliminates those nuisance early morning starts.

#### BRACKET MOUNT

New multi fit bracket allows easy installation on any surface

#### ANTENNA EXTENSIONS

Extension kits can be fitted in field if required

#### PLUS SERIES SENSORS

Highest reliability and calibration free

#### THE AQUASMART CD

The **AquaSmart CD** is the ideal choice for boosted systems, where the filter pump must be running before the solar pump is allowed to start.

The filter pump is simply plugged into the **AquaSmart CD**, which detects that the filter pump is turned on. It then allows the solar pump to start if required.

The **AquaSmart CD** provides no complicated wiring, offers a simple setup, and avoids the overloading of chlorinators and timers.

#### THE AQUASMART REMOTE

- AquaSmart RP and AquaSmart RB

Dontek has a remote range which simplifies new installations and eliminates the need to find damaged wiring when upgrading or servicing.

- Innovative Design
- Simple Button Configuration
- Lightening suppression
- Tropical Mode
- Vermin Resistant
- Large back lit LCD module
- Anti Freeze
- Heavy Duty Omron Products
- Built In Clock with battery backup
- Marine Grade UV Sensor Cable
- Self Diagnostic program
- 3 Year warranty
- Surge Protection
- Auto Sampling
- Winter Mode
- Australian Made
